

2nd University Challenge Africa

during IFAT Africa from July 9 – 11, 2019 in Johannesburg

Under the auspices of DAAD (German Academic Exchange Service) A challenge for the engineering student talents

Come and participate in the UNIVERSITY CHALLENGE AFRICA (UCA).

Student teams from African universities prove their skills and compete against each other in the following two activities:

1) IWRM – Integrated Water Resources Management

Infrastructure measures from water management, waste management and energy management have to be combined using DWA environment cards.

Prize:

The winning team will participate in the Young Water Professionals' Programme in Munich (Germany) in May 2020. Participation as well as travel costs are sponsored by the Wilo-Foundation.

2) Reporting

Student teams prove their skills in researching and gathering information at the fair, focusing on a fictitious employer. The accumulated knowledge needs to be applied by writing a reporting with a pre-defined focus.

Further information follows on-site.
