

7th University Challenge India

Wednesday/Thursday, October 18/19, 2023

Under the auspices of DAAD (German Academic Exchange Service) A competition for the engineering student talents

Come and participate in the 7th UNIVERSITY CHALLENGE INDIA (UCI). 10 teams (3 people per team) from universities in India have the chance to compete with each other in different disciplines:

Task 1:

IWRM – Integrated Water Resources Management

Infrastructure measurements from water management, waste management and energy management have to be combined using DWA environment cards.

Task 2:

Reporting

Student teams prove their skills in researching and gathering information at the fair, focusing on a fictitious employer. The accumulated knowledge needs to be applied by writing a reporting with a pre-defined focus. Further information follows on-site.

Target Group/Requirements

The participants should be Bachelor or Master students in the disciplines water management, waste management, civil engineering, environmental engineering, or related disciplines. Each team consists of 3 students.

Prize

The winning team will participate in the Young Water Professionals' Programme in Munich (Germany) in May 2024. Participation as well as travel costs are sponsored by the Wilo-Foundation!
