Day of Municipalities

Flood and heavy Rain
Prevention in Urban
Planning and Design Practice

A joint event by DWA and the communal umbrella organizations

Moderation: Bernd Düsterdiek,
Deutscher Städte- und Gemeindebund, Bonn

Foto: iStock

Event description

Precaution for flood and heavy rainfall events is high on the municipal agenda. Which measures must cities, districts and municipalities consider and for which risks do citizens and businesses have to take precautions themselves? How much rethinking is required in municipal planning practice? Which new professional qualifications are required? The Day of Municipalities is going to address these issues and present practical examples of possible solutions. The event will be concluded with a panel discussion, which is intended to give an outlook on the next necessary steps from the point of view of the federal, state and local authorities.

Program

- | | |
|----------|--|
| 11 am | Welcome and Introduction
<i>Dr. Thorsten Mertins, Deutscher Landkreistag, Berlin</i> |
| 11:10 am | Planning of Flood Prevention
