

University Challenge China

Saturday, April 20th, 2024

Under the auspices of DAAD (German Academic Exchange Service) A competition for the engineering student talents

Come and participate in the the University Challenge CHINA (UCC). Student teams from Chinese universities prove their skills and compete against each other in the following two activities:

Task 1:

IWRM – Integrated Water Resources Management

Infrastructure measurements from water management, waste management and energy management have to be combined using DWA environment cards.

Task 2:

Reporting

Student teams prove their skills in researching and gathering information at the fair, focusing on a fictitious employer. The accumulated knowledge needs to be applied by writing a reporting with a pre-defined focus. Further information follows on-site.

Target Group/Requirements

The participants should be Bachelor or Master students in the disciplines water management, waste management, civil engineering, environmental engineering, or related disciplines. Each team consists of 3 students.

Prize

Attractive prizes await the three best teams!
