

# Become a sponsor of professional competitions

## Promoting young talents thought differently

# Learning in Competition

People strive to compete with others and to prove their skills. The experiences, that you gain in competitions and in exchanges with competitors are unique and sustainable.

DWA has actively supported the idea of learning in competition since 2010. We aim to build a competition network from the regional league to the World Cup.

With a few regional association competitions, the German Learning in Competition Championship at IFAT in Munich (DWA Water Skills) and Skill #55 Water Technology at the WorldSkills Championships, this network already exists.

In order to pursue this goal and to further professionalise our work in this area, we rely on the support of the industry.

So you are an important part of attracting and training new, qualified professionals!

# The Competitions

## From the regional league to the World Cup

With the competitions „Water Skills Germany“ for trainees and „World Water Skills“ for professionals with participants from Germany and all over the world, DWA will be hosting one of the central action areas at IFAT Munich.

By participating in international competitions, DWA emphasises the importance of the topic of water and wastewater for the world. We want to put the operating staff working on the plants every day in the public spotlight.

# COMPETITIONS

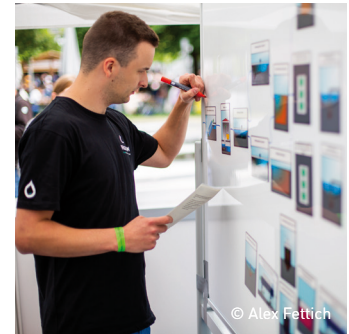

# Water Skills Germany

## Competition for trainees

The German Championship at IFAT Munich for apprentices serves as the first step towards further selection for the World Water Skills.

The first 3 places will be invited to the assessment training for participation in the WorldSkills in Skill #55 Water Technology. The DWA talent factory was set up for this purpose.

# World Water Skills

## Competition for professionals

The World Water Skills at IFAT in Munich serve as the first step towards further selection for the path to international competitions such as the weftec Operations Challenge USA or the upcoming IWA Operations Challenges.

Young professionals up to the age of 23 also have the opportunity to be part of the DWA talent pool.

# COMPETITION FOR PROFESSIONALS

# Your sponsorship at IFAT

You would like to be present at one of the most central points of the fair?

Become a sponsor of the professionals competitions!

Our competition area is located in the Atrium West directly behind one of the main entrances to the fair. Here you can hang a banner on our area boundary, display brochure material at the area or even, if applicable, tell the facts about the device/equipment you are using during the competition. In addition, you can be part of the award ceremony and present the prizes.

# Your Sponsorship International

Support our international activities as a sponsor and become a partner of the DWA Talent School or the professionals at the international competitions. These projects require a lot of effort but also have great appeal.

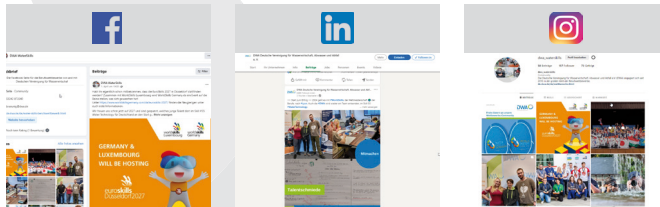

**Sponsor of the German national team in wastewater technology**  
doesn't sound bad, does it?

SPONSORING

# Social Media

With our social media activities, we give you another opportunity to be visible in the DWA network.

# Key facts

We do not quote the usual package prices here, as we would like to agree an individual package with you, depending on your ideas.

From sponsoring at IFAT or providing teamwear abroad, to being the station sponsor of a station in the competition, to being the main sponsor of our national teams, anything is possible!

We promise you professional handling and you will be thrilled by the spirit our competitions generate!

# Competitions abroad

In recent years, some Water Skills have also taken place abroad. Their winning teams thereupon competed at the World Water Skills in Munich and promoted international exchange among the operating staff.
