International Forum

Sustainability and water

The DWA Dialogue Berlin will take place on 18 and 19 September. It is the annual conference of the DWA. In our anniversary year, we look forward to top speakers at the International Forum. It is dedicated to the Strategic Development Goals (SDGs) of the United Nations and is entitled "Sustainability and Water: Halfway to Achieving the SDGs". The IWA, the EWA, the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), the Global Water

Operators' Partnerships Alliance (GWOPA) and the United Nations University (UNU) are involved.

To enable you to participate from anywhere, we will be livestreaming the event. The registration fee for online participation in the International Forum on 19 September, 2023 is €60 (€50 for members). The Forum will be held in English.

Speakers

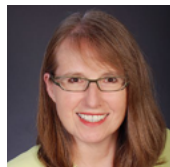

Dr.-Ing. Lisa Broß
International Water Association, Young Water Professionals Germany

Wendy Francken*
European Water Association e. V.

Dipl.-Ing. Barbara Gerhager
German society for International Cooperation (GIZ) GmbH

Prof. Edeltraud Guenther

Global Water Operators' Partnerships Alliance

Prof. Dr. Harsha Ratnaweera
Norwegian University of Life Sciences

Prof. Dr. Kalanithy Vairavamoorthy
International Water Association

*Gives a welcome address at the DWA Dialogue on 18 September

About DWA

German Association for Water, Wastewater and Waste

DWA - Three letters that stand for the experience and competence of its members - in sewage plants, in planning and production, in research and administration.

We have resolved to promote the water and waste management and to bring together the specialists working in this field.

The approximately 14,000 members represent specialists and executives from municipalities, universities, engineering offices, authorities and companies.

Our main activities are preparing and updating the DWA Set of Rules and engaging in national and international cooperation to draft special standards. This work does not only refer to technical and scientific issues, but also to the economic and legal aspects of environmental and water protection.
